

Tenant-Connected CMMC Pre-Assessment Report

Microsoft 365 / Entra Technical Readiness Scan

CONFIDENTIAL
Internal Use Only — Not an Official CMMC Assessment

Organization	Test CarmeTech
Tenant	CarmeTech
Primary Domain	carmetechnology.com
Scan Name	Test 2
Scan Date	May 27, 2026, 4:34 PM
Report Generated	May 27, 2026, 5:14 PM
Generated By	jmurray@vtccorp.us
Target CMMC Level	Level 2 (110 Controls)
Scan Status	completed with warnings

Tenant Scan Health: 27% · Weak

Executive Summary

27% Tenant Scan Health Weak	82% Assessment Confidence data coverage	25 / 110 Controls Touched of CMMC L2 controls	11 Evidence Snapshots auto-generated
11 Checks Run total rules evaluated	3 Passed checks passed	6 Gaps Found failed checks	8 Findings requiring review

Scan Interpretation

This pre-assessment scanned 11 Microsoft tenant configuration checks across 5 assessment packs. The tenant shows significant gaps requiring remediation. 1 critical and 4 high severity findings were identified. 1 assessment pack(s) encountered data availability issues (see Pack Summary).

Assessment Scope & Limitations

What This Scan Evaluated

- Microsoft Entra ID user accounts, guest accounts, and group membership
- MFA registration status and authentication method coverage per user
- Conditional Access policies, MFA enforcement rules, and legacy authentication blocking
- Sign-in logs and failed/risky authentication events
- Directory audit logs including role changes, user/group modifications, and policy changes
- Microsoft Secure Score and actionable improvement recommendations
- Microsoft Intune managed device inventory and compliance state (if Intune is licensed and enrolled devices exist)

What This Scan Does Not Fully Evaluate

- SSP (System Security Plan) completeness or quality
- CUI scope documentation and data flow diagrams
- Policies, procedures, and documented controls
- Physical security controls
- Personnel security, background checks, or training records
- Risk management plans, risk assessments, or risk registers
- Incident response plan testing or exercises
- Backup and recovery testing
- Firewall configuration or network segmentation (unless Microsoft-integrated)
- Non-Microsoft systems, applications, or infrastructure
- Assessor interviews or hands-on technical testing

Important Disclaimer

This report is a technical pre-assessment based on Microsoft tenant configuration and Microsoft Graph API data. It is not an official CMMC assessment and does not replace a C3PAO assessment, SSP review, or formal compliance audit. Final CMMC certification requires review of policies, procedures, evidence, interviews, and testing by a certified assessor.

Assessment Pack Summary

Identity Pack					COMPLETE
Checks	Passed	Gaps	Findings	Evidence	
3	3	2	2	3	
Authentication Pack					COMPLETE
Checks	Passed	Gaps	Findings	Evidence	
1	1	1	1	1	
Conditional Access Pack					COMPLETE
Checks	Passed	Gaps	Findings	Evidence	
2	2	0	0	2	
Device / Intune Pack					FAILED
Checks	Passed	Gaps	Findings	Evidence	
2	2	0	2	2	
Data unavailable — check permissions, licensing, or tenant configuration					
Audit / Sign-in Pack					COMPLETE
Checks	Passed	Gaps	Findings	Evidence	
2	2	0	2	2	
Security Score Pack					COMPLETE
Checks	Passed	Gaps	Findings	Evidence	
1	1	1	1	1	

CMMC Control Coverage

Total CMMC Level 2 Controls	110
Controls touched by tenant scan	25
Controls NOT assessed by tenant scan	85
Controls with findings (gaps)	21
Controls with evidence snapshots	25
Controls with evidence requests	17
Controls requiring manual review	85

Microsoft tenant data provided assessment signals for 25 of 110 CMMC Level 2 controls. Controls not touched by the tenant scan still require manual review, SSP documentation, and assessor validation.

Findings (8 total)

CRITICAL Severity (1)

CRITICAL	MFA Registration Coverage — Gap Detected
Observed:	1 of 7 users (14%) registered for MFA. 6 users missing MFA registration.
Remediation:	Enforce MFA registration via Conditional Access. Run a targeted campaign for unregistered users. Consider requiring MFA registration at next sign-in.
Controls:	IA.L2-3.5.3 IA.L1-3.5.2 AC.L2-3.1.13

HIGH Severity (4)

HIGH	Unique Named Accounts — Gap Detected
Observed:	2 of 8 accounts match shared/generic naming patterns.
Remediation:	Review flagged accounts. Assign dedicated owners, rename service accounts, or disable/remove accounts that are no longer needed.
Controls:	AC.L1-3.1.1 AC.L1-3.1.2 IA.L1-3.5.1

HIGH	Stale and Disabled User Review — Gap Detected
Observed:	0 stale (90+ days inactive), 1 disabled, 7 with no sign-in history.
Remediation:	Review stale accounts. Disable or remove accounts with no recent sign-in. Document the review as an access review record.
Controls:	AC.L1-3.1.1 IA.L2-3.5.6 CA.L2-3.12.3

HIGH	Sign-in Logs Available and Reviewed — Partial
Observed:	10 sign-in events retrieved. 4 failures, 10 risky, 0 legacy client sign-ins.
Remediation:	Upload sign-in log review notes or a log review worksheet as evidence. Investigate high-failure or risky sign-in patterns.
Controls:	AU.L2-3.3.1 AU.L2-3.3.5 SI.L2-3.14.6 CA.L2-3.12.3

HIGH	Directory Audit Logs Available — Partial
Observed:	55 audit events retrieved. 12 role changes, 15 user/group changes, 0 CA policy changes.
Remediation:	Upload a directory audit log review summary or SIEM export as evidence. Document your audit log review process.
Controls:	AU.L2-3.3.1 AU.L2-3.3.2 AU.L2-3.3.8 AU.L2-3.3.9

INFORMATIONAL Severity (3)

INFORMATIONAL	Managed Devices Inventory — Data Unavailable
Observed:	No Intune managed device data available.
Remediation:	Grant DeviceManagementManagedDevices.Read.All permission. Confirm Intune is licensed and deployed.
Controls:	CM.L2-3.4.3 IA.L1-3.5.1 AC.L2-3.1.18

INFORMATIONAL	Device Compliance Enforcement — Data Unavailable
Observed:	No device data available.
Remediation:	Grant DeviceManagementManagedDevices.Read.All permission.
Controls:	CM.L2-3.4.1 CM.L2-3.4.2 CM.L2-3.4.6 SI.L1-3.14.1

INFORMATIONAL	Microsoft Secure Score Snapshot — Gap Detected
Observed:	Current Secure Score: 109.58/273 (40%). 0 controls below 50%.
Remediation:	Review Microsoft Secure Score recommendations. Prioritize identity and access controls, device compliance, and data protection improvements.
Controls:	IA.L2-3.5.3 AC.L2-3.1.12 CM.L2-3.4.1 AU.L2-3.3.1 SI.L1-3.14.1

Evidence Snapshots (11)

Title	Pack	Source	Date	Status
Microsoft Tenant User Inventory Snapshot	Identity Pack	Microsoft Graph	May 27, 2026	Pending Review
Stale Account Review Snapshot	Identity Pack	Microsoft Graph	May 27, 2026	Pending Review
Guest User Inventory Snapshot	Identity Pack	Microsoft Graph	May 27, 2026	Pending Review
MFA Registration Snapshot	Authentication Pack	Microsoft Graph	May 27, 2026	Pending Review
Conditional Access Policy Snapshot	Conditional Access Pack	Microsoft Graph	May 27, 2026	Pending Review
Legacy Authentication Block Snapshot	Conditional Access Pack	Microsoft Graph	May 27, 2026	Pending Review
Intune Device Inventory Snapshot	Device / Intune Pack	Microsoft Graph	May 27, 2026	Pending Review
Intune Device Compliance Snapshot	Device / Intune Pack	Microsoft Graph	May 27, 2026	Pending Review
Sign-in Log Review Snapshot	Audit / Sign-in Pack	Microsoft Graph	May 27, 2026	Pending Review
Directory Audit Log Snapshot	Audit / Sign-in Pack	Microsoft Graph	May 27, 2026	Pending Review
Microsoft Secure Score Snapshot	Security Score Pack	Microsoft Graph	May 27, 2026	Pending Review

Evidence Requests (6)

Upload evidence for: Unique Named Accounts	OPEN
Review flagged accounts. Assign dedicated owners, rename service accounts, or disable/remove accounts that are no longer needed.	
Suggested filename: PA-001_identity_evidence_YYYY-MM-DD	
Controls: AC.L1-3.1.1 AC.L1-3.1.2 IA.L1-3.5.1	
Upload evidence for: Stale and Disabled User Review	OPEN
Review stale accounts. Disable or remove accounts with no recent sign-in. Document the review as an access review record.	
Suggested filename: PA-002_identity_evidence_YYYY-MM-DD	
Controls: AC.L1-3.1.1 IA.L2-3.5.6 CA.L2-3.12.3	
Upload evidence for: MFA Registration Coverage	OPEN
Enforce MFA registration via Conditional Access. Run a targeted campaign for unregistered users. Consider requiring MFA registration at next sign-in.	
Suggested filename: PA-004_authentication_evidence_YYYY-MM-DD	
Controls: IA.L2-3.5.3 IA.L1-3.5.2 AC.L2-3.1.13	
Upload evidence for: Sign-in Logs Available and Reviewed	OPEN
Upload sign-in log review notes or a log review worksheet as evidence. Investigate high-failure or risky sign-in patterns.	
Suggested filename: PA-009_audit_evidence_YYYY-MM-DD	
Controls: AU.L2-3.3.1 AU.L2-3.3.5 SI.L2-3.14.6 CA.L2-3.12.3	
Upload evidence for: Directory Audit Logs Available	OPEN
Upload a directory audit log review summary or SIEM export as evidence. Document your audit log review process.	
Suggested filename: PA-010_audit_evidence_YYYY-MM-DD	
Controls: AU.L2-3.3.1 AU.L2-3.3.2 AU.L2-3.3.8 AU.L2-3.3.9	
Upload evidence for: Microsoft Secure Score Snapshot	OPEN
Review Microsoft Secure Score recommendations. Prioritize identity and access controls, device compliance, and data protection improvements.	
Suggested filename: PA-011_secure_score_evidence_YYYY-MM-DD	
Controls: IA.L2-3.5.3 AC.L2-3.1.12 CM.L2-3.4.1 AU.L2-3.3.1 SI.L1-3.14.1	

Recommended Roadmap (5 actions)

P1 · Immediate	1. Perform User and Access Review	Identity & Access
Conduct a formal review of all user accounts, guest accounts, and privileged roles. Document the review and remove or disable accounts that are no longer needed.		
Controls: AC.L1-3.1.1 AC.L1-3.1.2 IA.L1-3.5.1 IA.L2-3.5.6		
P1 · Immediate	2. Configure MFA and Conditional Access Baseline	Authentication
Enable and enforce MFA for all users via Conditional Access. Block legacy authentication. Confirm all users are registered for MFA.		
Controls: IA.L2-3.5.3 IA.L1-3.5.2 AC.L2-3.1.12 AC.L2-3.1.13		
P2 · Short-term	3. Configure Endpoint Compliance and Device Management	Endpoint Management
Ensure all endpoints are enrolled in Intune. Create and assign compliance policies. Block noncompliant devices via Conditional Access.		
Controls: CM.L2-3.4.1 CM.L2-3.4.2 CM.L2-3.4.3 SI.L1-3.14.1		
P2 · Short-term	4. Configure Logging and Audit Review	Audit & Logging
Ensure sign-in and audit logs are retained and reviewed on a scheduled basis. Document review results. Configure SIEM or log alerts if available.		
Controls: AU.L2-3.3.1 AU.L2-3.3.2 AU.L2-3.3.5 AU.L2-3.3.8		
P3 · Long-term	5. Run Microsoft Security Baseline Review	Security Posture
Review all Microsoft Secure Score recommendations. Prioritize identity, device, and data protection improvements with direct CMMC relevance.		
Controls: IA.L2-3.5.3 CM.L2-3.4.1 SI.L1-3.14.1
